FortiWeb Administrator

Category: Networking & Security | **Vendor:** Fortinet

Duration: 24.00 hours (3 days) **19.5 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

In this course, you will learn about FortiWeb deployment, configuration, and management. You will learn how to set up server objects, define security policies, and implement HA. This course covers protection against advanced threats using data validation, client-side security, and machine learning. You will also explore API security, bot mitigation, and application delivery features such as URL rewriting, single sign-on, caching, and acceleration. Additional topics include DoS prevention, logging, FortiAI integration, compliance standards (PCI DSS, OWASP), and basic troubleshooting.

This exam is part of the FCP Cloud Security certification track.

About This Course

In this course, you will learn about FortiWeb deployment, configuration, and management. You will learn how to set up server objects, define security policies, and implement HA. This course covers protection against advanced threats using data validation, client-side security, and machine learning. You will also explore API security, bot mitigation, and application delivery features such as URL rewriting, single sign-on, caching, and acceleration. Additional topics include DoS prevention, logging, FortiAI integration, compliance standards (PCI DSS, OWASP), and basic troubleshooting.

This exam is part of the FCP Cloud Security certification track.

Who Should Attend

Security professionals involved in the management, configuration, administration, and monitoring of FortiWeb in small to large enterprise deployments should attend this course.

Prerequisites & Entry Requirements

General Prerequisites:

You must have an understanding of the topics covered in NSE 4 - FortiOS Administrator, or have equivalent experience.

It is also recommended that you have an understanding of the following topics:

- HTTP protocol
- Basic knowledge of HTML, JavaScript, and server-side dynamic page languages, such as PHP

Learning Outcomes

Upon successful completion of this course, participants will be able to:

After completing this course, you will be able to:

- Define web application firewall and describe its role in the network
- Perform basic configuration and initial deployment
- Configure FortiWeb for deployment in a load balanced network environment
- Implement SSL/TLS encryption, including inspection and offloading
- Configure and customize FortiWeb signatures
- Configure FortiWeb to protect against DoS
- Configure API protection and bot mitigation
- Implement FortiWeb machine learning capabilities
- Configure user authentication and access control features
- Configure FortiWeb to ensure Payment Card Industry Data Security Standard (PCI DSS) compliance of your web applications
- Configure FortiWeb to perform HTTP content based routing, rewriting, and redirection
- Perform basic troubleshooting of FortiWeb

Detailed Course Outline

- 1. Introduction
- 2. Basic Setup
- 3. Web Application Security
- 4. API Discovery and Protection
- 5. Bot Mitigation
- 6. Application Delivery
- 7. Additional Configuration
- 8. Compliance
- 9. Troubleshooting

Skills You Will Learn:

After completing this course, you will be able to:

- Define web application firewall and describe its role in the network
- Perform basic configuration and initial deployment
- Configure FortiWeb for deployment in a load balanced network environment
- Implement SSL/TLS encryption, including inspection and offloading
- Configure and customize FortiWeb signatures
- Configure FortiWeb to protect against DoS
- Configure API protection and bot mitigation
- Implement FortiWeb machine learning capabilities
- Configure user authentication and access control features
- Configure FortiWeb to ensure Payment Card Industry Data Security Standard (PCI DSS) compliance of your web applications
- Configure FortiWeb to perform HTTP content based routing, rewriting, and redirection
- Perform basic troubleshooting of FortiWeb

Frequently Asked Questions

Q: What delivery options are available for FortiWeb Administrator?
