Course Overview

AIX Jumpstart for UNIX/Linux Professionals Course Overview

This IBM AIX Jumpstart for Experienced UNIX/Linux Administrators training course is targeted at cross-training experienced HP-UX, SUN Solaris and other UNIX Administrators who wish to implement and manage systems capable of running the AIX Operating System. Students attending this course should therefore have a good understanding and experience of managing and running UNIX like systems.

Reference will be made to the AIX commands required to administer the system, although practical work will concentrate on using the System Management Interface Tool (SMIT) to achieve the course objectives. Although the course is based on AIX Version 7.1, it is also appropriate for prior releases of AIX.

Exercises and examples are used throughout the course to give practical hands-on experience with the techniques covered.
