Course Overview

Whether you are new to business analysis, or are experienced and want a more formal approach, it's essential to know and practice the basics. This course provides you with the foundational skills you need to deliver value to your stakeholders and organization. You will learn how to help your business clients articulate their business problem or opportunity, plan business analysis activities, as well as learn the basics of eliciting, analyzing, documenting, managing, and communicating requirements through the life cycle of the project. By grasping these foundational skills, you can contribute significantly to the success of your organization's projects.

About This Course

Whether you are new to business analysis, or are experienced and want a more formal approach, it's essential to know and practice the basics. This course provides you with the foundational skills you need to deliver value to your stakeholders and organization. You will learn how to help your business clients articulate their business problem or opportunity, plan business analysis activities, as well as learn the basics of eliciting, analyzing, documenting, managing, and communicating requirements through the life cycle of the project. By grasping these foundational skills, you can contribute significantly to the success of your organization's projects.

Who Should Attend

New business analysts, people that have project experience but have not had formal business analysis training, or experienced BAs and project managers who want a more formal and industry-standard business analysis approach will gain new skills and methods from this course.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

Articulate the key activities and artifacts of a business analyst. Increase project success by better defining the business need. Plan the requirements effort to ensure optimal productivity. Identify and analyze stakeholders and learn to optimize stakeholder communication. Reduce rework by eliciting and discovering requirements correctly the first time. Document good requirements by writing them clearly, concisely, and completely using simple templates. Learn how to trace and prioritize requirements to ensure they link to business value. Manage the requirements throughout the project.
