## About This Course

You'll learn what it means to turn infrastructure into code so that you can automate the configuration, deployment and management of your Windows servers.

## Who Should Attend

This course is geared toward development, engineering, and operations staff. Students in this class should have some familiarity and comfort with the following:

1. Writing code (of just about any flavor) in a text editor
2. Working on the command line
3. Basic system administration installing packages, configuring those packages, starting service

# Learning Outcomes

---

**Upon successful completion of this course, participants will be able to:**

Get started with Chef by taking Chef Essentials. It's a two-day instructor-led course that covers all the basics. You'll learn what it means to turn infrastructure into code so that you can automate the configuration, deployment and management of your servers. You'll also learn about Chef Architecture and the set of tools included in the Chef Development Kit (ChefDK). Each of the core units includes hands-on exercises that will give you confidence in your new skills. At the end of the course, you'll come away with a repo and the skills to start automating your own infrastructure.

## Additional Course Details

---

Nexus Humans Chef Essentials for Windows training program is a workshop that presents an invigorating mix of sessions, lessons, and masterclasses meticulously crafted to propel your learning expedition forward.
