Course Overview

This course focuses on the new and advanced features of HTML5, covering how to create HTML5 and CSS3 markup that will work well on the widest possible variety of web browsers, mobile devices, and machine readers, such as search engine web crawlers.

About This Course

This course focuses on the new and advanced features of HTML5, covering how to create HTML5 and CSS3 markup that will work well on the widest possible variety of web browsers, mobile devices, and machine readers, such as search engine web crawlers.

Who Should Attend

This course is designed for those who have experience authoring content in HTML and CSS, and want to learn how to use new HTML5 and CSS3 features. This course can be taught on Windows®, Mac OS® X, or Linux®, and supports developers who work in any of those environments. Although JavaScript® knowledge is helpful, HTML and CSS are the focus, so this course does not require that the learner have extensive JavaScript skills.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

In this course, you will develop web content in HTML5 and CSS3 following principles of responsive web design. You will: Optimize HTML content to take advantage of HTML5 and CSS3 features. Write advanced CSS3 selectors and media queries. Use advanced background and border options introduced in CSS3. Use advanced text formatting options introduced in CSS3. Use HTML5 graphics and multimedia elements, including transforms, animation, audio, and video. Follow best practices to enable HTML content to be successfully processed by many different web browsers and machine readers.
