

Linux System Security

Duration: 24.00 hours (3 days)

19.5 CPD Hours

Rating: ★ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

Linux System Security Course Overview

This highly practical instructor led Linux System Security course is aimed at Linux System Administrators who wish to enhance their knowledge of Linux security and increase the security level of their Linux systems.

The course covers detecting and restricting users and applications for Linux and Red Hat based Linux systems. Security compliance, logging and auditing are also covered along with hardening related tasks. The topics taught are relevant for all Linux distributions. The command line is demonstrated and used extensively throughout the course.

This Linux System Security course is based on the Red Hat/CentOS Linux distribution, the delegate will be able to apply the concepts covered on this course to other Linux based distributions.

Exercises and examples are used throughout the course to give practical hands-on experience with the techniques covered.

About This Course

Linux System Security Course Overview
