

Logging, Monitoring and Observability in Google Cloud

Duration: 24.00 hours (3 days)

19.5 CPD Hours

Rating: ★ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Certification: Professional Cloud DevOps Engineer certification

Course Overview

This course teaches you techniques for monitoring, troubleshooting, and improving infrastructure and application performance in Google Cloud. Guided by the principles of Site Reliability Engineering (SRE), and using a combination of presentations, demos, hands-on labs, and real-world case studies, attendees gain experience with full-stack monitoring, real-time log management and analysis, debugging code in production, tracing application performance bottlenecks, and profiling CPU and memory usage.

About This Course

This course teaches you techniques for monitoring, troubleshooting, and improving infrastructure and application performance in Google Cloud. Guided by the principles of Site Reliability Engineering (SRE), and using a combination of presentations, demos, hands-on labs, and real-world case studies, attendees gain experience with full-stack monitoring, real-time log management and analysis, debugging code in production, tracing application performance bottlenecks, and profiling CPU and memory usage.

Who Should Attend

This class is intended for the following customer job roles:

Cloud architects, administrators, and SysOps personnel

Cloud developers and DevOps personnel

Learning Outcomes

Upon successful completion of this course, participants will be able to:

This course teaches participants the following skills:

Plan and implement a well-architected logging and monitoring infrastructure

Define Service Level Indicators (SLIs) and Service Level Objectives (SLOs)

Create effective monitoring dashboards and alerts

Monitor, troubleshoot, and improve Google Cloud infrastructure

Analyze and export Google Cloud audit logs

Find production code defects, identify bottlenecks, and improve performance

Optimize monitoring costs

Additional Course Details

Nexus Humans Logging, Monitoring and Observability in Google Cloud training program is a workshop that presents an invigorating mix of sessions, lessons, and masterclasses meticulously crafted to propel your learning expedition forward.

This immersive bootcamp-style experience boasts interactive lectures, hands-on labs, and collaborative hackathons, all strategically designed to fortify fundamental concepts.

Guided by seasoned coaches, each session offers priceless insights and practical skills crucial for honing your expertise. Whether you're stepping into the realm of professional skills or a seasoned professional, this comprehensive course ensures you're equipped with the knowledge and prowess necessary for success.

While we feel this is the best course for the Logging, Monitoring and Observability in Google Cloud course and one of our Top 10 we encourage you to read the course outline to make sure it is the right content for you.

Additionally, private sessions, closed classes or dedicated events are available both live online and at our training centres in Dublin and London, as well as at your offices anywhere in the UK, Ireland or across EMEA.

Frequently Asked Questions

Q: What delivery options are available for Logging, Monitoring and Observability in Google Cloud?
