Duration: 24.00 hours (3 days)

19.5 CPD Hours

Rating: ★ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

Streamline business processes and automate manual tasks across your organization by building no-code automation solutions with Flow Builder. In this 3-day class designed for administrators, our experts will introduce you to Screen and Record-Trigger Flows, in addition to various Flow elements and resources. Learn how to effectively create and manage Flows that champion automation best practices, solve for user requirements, and empower you to get more out of Salesforce.

About This Course

Streamline business processes and automate manual tasks across your organization by building no-code automation solutions with Flow Builder. In this 3-day class designed for administrators, our experts will introduce you to Screen and Record-Trigger Flows, in addition to various Flow elements and resources. Learn how to effectively create and manage Flows that champion automation best practices, solve for user requirements, and empower you to get more out of Salesforce.

Who Should Attend

This class is designed for experienced Salesforce Administrators with little or no Flow experience who need to streamline business processes with no-code automated solutions. This class is not recommended for developers. However, if you are a developer interested in learning Flow, we highly recommend Declarative Development for Platform App Builders in Lightning Experience (DEX403).

Learning Outcomes

Upon successful completion of this course, participants will be able to:

When you complete this course, you will be able to:

Create automated no-code solutions with Salesforce Flow.

Analyze use cases and effectively translate requirements into design plans that detail accurate Flow building processes.

Understand and leverage various Flow types, elements, and resources.

Build Screen Flows and manage screen layouts and field visibility.

Implement Flows on Home and Record pages.

Automate business processes by creating Record-Triggered Flows (based on record create, update, or delete) to perform specific actions.

Identify best practices for creating and managing Flows.
