Course Information

Delivery Format: Instructor Led - Online

Course Overview

Microsoft® SharePoint® is a platform designed to facilitate collaboration and allow people to use familiar applications and web-based tools to create, access, store, and track documents and data in a central location. As such, SharePoint has many distinct features that must be enabled and configured, and many content structures that can be selected, added, and configured. In this course, you will learn how to create, configure, and manage SharePoint sites so that your team or organization can share information and collaborate effectively. SharePoint content structures and configuration options are complex. Site owners must understand what features, options, and content structures are available in SharePoint, and how to properly configure them. With SharePoint sites, features, and content structures properly implemented, users will be able to securely share files, collaborate on documents, and access information they need to work with their colleagues more effectively.
