

SharePoint - Site Owner with Power Platform (Modern Experience)

Category: Office Applications | **Vendor:** Microsoft

Duration: 8.00 hours (1 days)

6.5 CPD Hours

Rating: ★ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

Microsoft® SharePoint®, in conjunction with the Microsoft 365 suite of productivity and office automation tools, provides tools to create and manage a corporate intranet, facilitate content sharing and collaboration, and enable users to create, access, store, and track documents and data in a central location. By default, SharePoint provides end users with a generous set of permissions, enabling users to create and customize their own sites as site owners, and create and collaborate on team site content. Users who have grown comfortable with these fundamental content-authoring capabilities may want to move on to more advanced features, such as connecting multiple SharePoint sites through a hub, importing list data from external sources, implementing user input validation features, applying conditional formatting, and using Power Apps® to provide custom user interfaces for data collected in SharePoint. This course focuses on issues related to planning and implementing an intranet with multiple communication sites and team sites interconnected through a hub site to provide unified navigation search, and formatting.

About This Course

Microsoft® SharePoint®, in conjunction with the Microsoft 365 suite of productivity and office automation tools, provides tools to create and manage a corporate intranet, facilitate content sharing and collaboration, and enable users to create, access, store, and track documents and data in a central location. By default, SharePoint provides end users with a generous set of permissions, enabling users to create and customize their own sites as site owners, and create and collaborate on team site content. Users who have grown comfortable with these fundamental content-authoring capabilities may want to move on to more advanced features, such as connecting multiple SharePoint sites through a hub, importing list data from external sources, implementing user input validation features, applying conditional formatting, and using Power Apps® to provide custom user interfaces for data collected in SharePoint. This course focuses on issues related to planning and implementing an intranet with multiple communication sites and team sites interconnected through a hub site to provide unified navigation search, and formatting.

Who Should Attend

This course is designed for Microsoft SharePoint site users who are already comfortable using SharePoint as a site user (site visitor or site member), but who want to advance to creating new sites and integrating them with features like Power Apps.

Prerequisites & Entry Requirements

General Prerequisites:

To ensure your success in this course, you should have basic end-user skills with a current version of Microsoft Windows. You should also have basic SharePoint site user skills such as the ability to view and enter data in SharePoint lists and libraries, and to navigate a typical SharePoint site.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

Plan and create a SharePoint-based multi-site intranet, including team and communication sites. Associate multiple sites with a hub site to provide unified navigation, search, and theme. Use advanced SharePoint features to manage content creation in lists and libraries, including custom page templates and various methods to import data. Configure lists with various input validation features to improve the quality of data entry and presentation. Use Power Apps Studio to create a custom user interface for entering data in a SharePoint list.
